Fall strawberries, grown in Utah, are in evidence on the Salt Lake market, arriving Tuesday, the 10th. They were grown by R. E. Egan of Woods Cross, Davis county, who expects to harvest the fruit until frost cuts down their growth. The berries were picked from vines that in the early part of the scason yielded the usual crop. After the first harvest a mowing machine was put on the patch, and the vines were cut down almost to their crowns. Afterwards a regular and thorough course of cultivation and irrigation was instituted, with the result that the vines again threw out their blossoms, and later a crop of berries equal in size and appearance to the spring crop, and excelling the spring product in flavor, was the result. Mr. Egan has about three acres now under this unique method of cultivation, and announces that he will supply strawberries to the local market as long as the weather remains warm enough to ripen them.

In a California Fruit Valley.

In a California Fruit Valley.

"Dead sea fruit!" That's what I call it!" exclaimed a gentleman, who, after attempting to eat one of the largest and most beautiful specimens of California peaches ever seen in Fulton Market, threw it away in disgust. And he was right; for, while it was an object to delight the eye, with its great size, perfect shape, delicate bloom and superb colorling, its flavor was decidedly vegetable. So New Yorkers of experience in such things buy California peaches to look at, and to serve with the dessert as the crowning ornaments of a perfect dinner, but lay in a supply of Delawares to eat; while in Chicago they say, "Oh, yes, California peaches are pretty, but the St. Jo. product is good enough for us."

Having thus persuaded themselves that all California peaches are tasteless and insipid, dwellers in the East wonder why the same article, put up in cans, should be so finely flavored, and generally superior to canned peaches from elsewhere. But the proposition is a very simple one. The peach for canning is not plucked until it is ripe, with all its julcy richness and delicate flavor fully developed, while that intended for shipment to a distance is gathered while still hard and devoid of everything save color and size. The California peach in its native orchard, sunwarmed, and ripened until so filled with rich juices that it is ready to drop from the tree, is a perfect fruit, as pleasing to the taste as to the eye; but only under such conditions can it attain perfection. When it is plucked its development is arrested, and after that it will only soften. Thus there is as much difference between a California peach in California and the same thing in New York as there is between a pineapple, luscious and sugar-sweet in its tropic field, and the pineapple of Northern markets, acid, fibrous, and bearing every evidence of having been cut long before the date of its maturity. The largest prune orchard in this country, if not in the world, is located at Los Gatos (the cats), on the western edge

which has its own waterworks and electric-light plant. Its drying-ground is twenty acres in extent, and it yields a net income of something like \$50,000

a year.

Near this Los Gatos orchard is a curious factory, said to be the only one of its kind in the world. It is a factory for the making of grape-food, and is devoted to the extracting and concendevoted to the extracting and concentrating, but not fermenting, of grape juice. During the season it consumes fifty tons of grapes every day, and produces 100,000 gallons of juice, concentrated to one-fourth of its original bulk. The ingenious process by which this is accomplished is simplicity itself. A small but constant stream of fresh juice flows into the upper end of a couper

A METHODIST PASTOR BLESSED.

citment is Great.

Chicago, Sept. 8.—There is great excitement in Hyde Park Methodist circles tonight over the report that Rev. Herbert G. Leonard, pastor of the leading church in that fashlonable suburb, had this afternoon received the papul blessing from Mgr. Satolli, It is said the ablegate blessed the Rev. Leonard in the name of the Pope at a function at the convent of the Sacred Heart to which the Methodist minister had been invited.

Mr. Leonard admitted to a reporter that it was true. He said he had received the blessing and that he was proud of it. Asked when he intended to leave the Methodist church to embrace Catholicism, he said that he would rather not talk on that subject. citment is Great.

accomplished is simplicity itself. A small but constant stream of fresh juice flows into the upper end of a copper cylinder two feet in diameter and nineteen feet long, which is inclined at a slight angle, and revolves slowly in a hot-water jacket that keeps it heated to 150 degrees. The juice forms a film on the interior of this cylinder, the heat evaporates all water from it, and the vapor is drawn off as soon as formed by great exhaust-fans that make 30c revolutions per minute. The juice occupies just sixty seconds in passing through the cylinder, and finally trickles from its lower end in a warm syrupy stream, robbed of none of its original elements or properties save three times its bulk of water.

The grapes used in such enormous quantities in this interesting factory, both red and white, are wine grapes, which, as the tourist observer soon discovers, are very different from raisin grapes, the former containing the more juice, and the latter the more saccharine matter. One of the surprising things about a raisin vineyard is the small size of its vines, which, being cut back every year, are rarely more than two or three feet high, and the great size of the bunches. These, when fully ripe, are cut and laid in shallow trays between the rows of vines, where, without the addition of any sugar, they are allowed to dry in the sun until they become raisins, which is all there is to the process.

Danville, Va., Sept. 9.—A terrible tragedy occurred in Pittsylvania county yesterolay morning about twenty miles from here. Wesley Powell had been paying attention to Miss Junie Adkins, and the young woman claimed that Powell had seduced her, under promise of marriage, and insigted on his marrying her. Sunday morning four of the Adkins boys and Smith Pruett went to Powell's father's house to force young Powell to marry Miss Adkins, when a row occurred. Mrs. Powell, mother of the young man, got in between the parties, when Allen Adkins shot and killed her. The husband fired on the Adkinses, slightly wounding two of them. BALFOUR'S BIMETALISM.

HOW THE LONDON PRESS CON-STRUES HIS LETTER.

It is One of the Most Extraordinary Documents Ever Signed by a British Minister.

London, Sept. 3.—The Graphic thinks the bimetalists will get coid comfort out of Hon. A. J. Balfour's letter explaining his recent utterances in Parliament against the feasibility of an international conference. "The letter," the Graphic says, "virtually confesses that the cause of which he is the permanent chairman is hopeless. The fact is that, even assuming theoretical existence of the bimetallic system, there is not sufficient motive power behind the nations to unmake the currency and other revolutions which please the academic disputants. In America returning prosperity has forced the silver men into silence."

The Daily News says on the same subject: "Mr. Balfour's letter is one of the most extraordinary documents that was ever signed by a British Minister. Mr. Balfour is now the authorized exponent of the Government financial policy. What he says the treasury says. Is I to be endured that the First Lord of the Treasury should treat the gold standard as a mere subject of academic debate? He does not seem to grasp the monometallist's view of the situation. A Mohammedan archibishop of Canterbury would not be more incongrous than 'a bimetallist First Lord of the Treasury."

The substance of Mr. Balfour's letter was that his views on bimetallism had undergone no change, and that he was and always had been in favor of an internal agreement, but he did not believe that an international conference called at this time would affect such an agreement.

He said today: "Fraker always was a shrewd, mean fellow. I knew him when he was a young man. He began to practice without a diploma in Triplett, Mo. This was law-breaking, but he was never arrested for it. Before long he turned in to be a druggist. His store was really an unilcensed liquor shop. He was arrested for this offense, and his business was broken up. He married and moved to Excelsior Springs, a watering place seventy miles away. "Fraker used to get into all sorts of little scrapes. He would do some mean thing and sink low in every one's estimation, but always managed to get back into the town's good graces again, He did get a medical diploma at last.

"I think he never married again, so he could live very comfortably. His father and mother died when he was a little boy, and he was brought up by an uncle, but was thrown on his own resources early in life, and drifted by slow degrees from little things to worse ones."
